PROFESSIONAL SUMMARY

Final-year Electrical & Electronics Engineering student with applied, self-directed expertise in Machine Learning, Deep Learning, and Generative AI. Independently designed and shipped a production-style AI Resume Intelligence Platform — a full-stack RAG application spanning ATS scoring, semantic matching, and LLM-based content generation, deployed end-to-end with Docker. Seeking remote AI/ML Engineer or Intern roles at global startups, bringing full-cycle ownership from model integration to production deployment.

TECHNICAL SKILLS

Languages: Python, SQL

ML / DL: Scikit-learn, PyTorch, Sentence Transformers

Generative AI & LLMs: LangChain, Hugging Face Transformers (FLAN-T5), RAG, FAISS

Agentic AI: Multi-agent architectures, LangGraph, tool-use pipelines

Data & Backend: NumPy, Pandas, PostgreSQL, FastAPI, Streamlit

DevOps & Cloud: Docker, Git/GitHub, AWS (Cloud Practitioner)

PROJECTS

AI Resume Intelligence Platform — *Python · FastAPI · LangChain · FAISS · Hugging Face · Docker · Streamlit*

Live demo: [\[add deployed URL\]](#) | **Code:** [\[add repo URL\]](#)

- Designed and independently built an end-to-end AI platform that scores resumes against job descriptions for ATS compatibility and identifies skill gaps using NLP and ML techniques, [add: e.g. tested across 50+ resume/JD pairs].
- Built a RAG-based conversational chatbot using LangChain and a FAISS vector store, enabling users to query and improve resumes via natural language, with [add: e.g. sub-2-second average response time].
- Automated generation of tailored cover letters, improvement suggestions, and role-specific interview questions using FLAN-T5 (Hugging Face Transformers).
- Engineered semantic similarity scoring with Sentence Transformers and Scikit-learn, improving match relevance over keyword-only ATS baselines by [add: e.g. X% in internal testing].
- Built a FastAPI backend and Streamlit frontend, containerized with Docker, and deployed to Render/Streamlit Cloud — owning the full production lifecycle solo.

EDUCATION

B.Tech, Electrical & Electronics Engineering

Jyotishmathi Institute of Technology and Science, Telangana | 2022 – 2026 | CGPA: 7.0 / 10.0
